

the loss of weather and traffic would be a great loss. i am an over the road truck driver and to be able to get traffic report 30 to 60 minutes before i get to that area and can find out if there are traffic delays that i can avoid is most helpful so that i can delivery my load on time without delay. the regular radio doesn't provide this. by the time i find a local station i have either missed the local update or i'm already in the traffic delays and the local station is of no help to me.in addition this is not a program that is being broadcast to the general public. if you are not a subscriber then you do not recieve these reports. i feel what the nba is tring to do is ridicules and uncalled for.

thank you for listening , steven weisner
